Sebastian,

Throughout the growth of California Palms and being apart of its current success, I have become very intrigued in this field. Helping others is something that I feel gives me a huge purpose, giving back to others and I feel I have a good connection with the other clients. I feel that all my strengths from the military including leadership, discipline, personal structure, and successful execution of the task given to me can only benefit the future of your company. I'm aware that you only have one case manager and I truly feel I have the dedication, motivation, and heart to be a good connection for the clients to staff through case management work. Not only do I feel the clients respect and come to me for numerous situations, but I feel the staff has the same level of respect and trust in me to get the task given to me accomplished, including the peer support group that I have been leading. I would do nothing less than learn everything I can to become a better employee and liaison for the clients. I believe its a great opportunity to not only better my future as a person but also as a story of success for you and California Palms.

I also believe that someone like me can take a lot of miscellaneous jobs off of the counselors and Kim's plate and still maintain the importance of a case managers position that would help the company's growth not only run smoothly but also productive. I am looking to relocate and I believe this is a great opportunity for myself. I would greatly appreciate the opportunity of being apart of your growing company.

If you would be interested in allowing me to be apart of this growing team, please let me know when you would have some time to discuss possible opportunities further.

Sincerely,
